

Public health round-up

Author(s):	No authors listed
Year:	2011
Journal:	Bulletin of The World Health Organization. 89 (2): 84-85

Abstract:

About 172 000 cases have been reported in Haiti since cholera broke out in October last year. More than half of these cases have required hospitalization and 3650 people have died so far in the epidemic.

Resource Description

Exposure :

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature:

resource focuses on specific type of geography

None or Unspecified

Geographic Location:

resource focuses on specific location

Non-United States

Non-United States: Africa

African Region/Country: African Country

Other African Country: Nigeria

Health Impact:

specification of health effect or disease related to climate change exposure

Infectious Disease

Infectious Disease: Vectorborne Disease

Vectorborne Disease: Mosquito-borne Disease

Mosquito-borne Disease: Malaria
